

Bernard C. Wetzel, Ph.D.

Executive Coach • Organization Consultant

Bernie provides coaching for organizations committed to enhancing the skills of their already successful leaders and high potentials. He facilitates strategic planning processes that enable organizations to define a clear and compelling future. And, he designs and facilitates executive retreats focused on reaching consensus on dealing with complex organizational challenges and opportunities. Over his thirty year business career, he has consulted on over five hundred executive off-sites and strategic planning processes and worked with thousands of leaders and managers.

Before founding Wetzel Consulting in 1997, Bernie led executive and organization development for Westinghouse Electric Corporation for ten years. He designed and implemented leadership development initiatives and provided consulting and executive coaching to its businesses. Bernie also spent ten years as Manager, Management and Organization Development for Westinghouse Financial Services, Inc. (WFSI)

His experience includes consumer goods, publishing, manufacturing, energy, broadcasting, real estate, insurance, technology, venture capital, investment banking, professional services, and transportation. He has consulted extensively in the public sector in economic development and higher education and in the non-profit sector in the performing arts and professional associations. Clients range from small architectural firms to Fortune 50 corporations, from family-owned companies to biotech firms, from large regional banks to public radio stations and from major health care systems to high tech manufacturing.
